RYNVELD'S DUTCH HYACINTHS

Our Hyacinth fields are located in those sections of Holland noted for producing the finest quality. Our extensive acreage with many of the fields devoted exclusively to varieties that are favorites with Florists, enables us to serve our customers with the cream of Holland's Hyacinths. Prices vary according to the size of the bulbs, of course, the large bulbs produce bigger and finer spikes with more individual florets. Our list consists of varieties which have proven to have the greatest merit. Not all varieties will bloom at the same time, we have therefore indicated the relative time of blooming (a) the earliest to (d) the latest.

BREEDER TULIPS

For sometime the dark, deep colors of the Breeder Tulips were neglected in favor of the brighter tones of the Darwin and Cottage Tulips. The last few years have seen revival of these beautiful Tulips, however, and a subsequent demand that should not be overlooked. Their odd, artistic colors, make a special appeal to American garden lovers.

The use of Breeder Tulips has steadily increased and we expect an unusual demand for these this year, and have prepared our stocks accordingly.

CROCUS—(Choice Bulbs)

One of the earliest flowers to bloom in the Spring, making an effective show when planted in masses in the Rock Garden, lawn or border. They are perfectly hardy and can be left in the ground undisturbed. In order to grow Crocus in a room or greenhouse, the pots or bowls in which they have been planted should be kept outdoors in the ground or in a cool place indoors until the middle of January; a warm temperature before that time will spoil them, after January 15th a temperature of 50 degrees to 55 degrees will bring them into bloom in a few weeks.

RYNVELD'S SUPERIOR PAPER WHITES

For many years Rynveld's Jacksonville grown Paperwhites have proved the finest available in this country. Climate conditions in Jacksonville equal those of Southern France, producing flowers standing well above the foliage. An unusually good growing season, most up to date equipment, and a thorough knowledge in the growing and curing of these bulbs are the responsible factors for Superior Paperwhites. The value of these bulbs is well known to the florist trade; at present prices they represent an opportunity for a quick and profitable turnover. They are flowered readily in from four to six weeks.

For water culture in the home they are becoming more popular every year, and for this purpose are being retailed by many kinds of merchants all over the Country. Can be brought into bloom from November to April, by planting bulbs weekly.

HARDY GARDEN LILIES

LILIAM CANDIDUM (Madonna or Annunciation Lily)

Becoming more plentiful and prices more reasonable. We handle very large quantities, giving us an advantage in the selection of quality stock and in prices. The number of flowers to the stem depends on the size of the bulb, the larger sizes producing as many as 25 flowers to a stem. The flowers are snow white with heavy yellow stamens. They are very hardy and will thrive in any ordinary soil. Bulbs now ready for delivery.

LILY OF THE VALLEY—BLEEDING HEARTS—TRITOMAS

Experienced "Lily of the Valley" forcers are far more interested in quality than in price. We offer only the very best strains for forcing, knowing well that our customers desire the best, even though the price may be slightly higher than for inferior quality. Our large Valley importation yearly, is conclusive evidence that we are supplying the stock that makes money for our customers. We operate our own packing warehouses, and every Pip that we send out is carefully inspected by our own men. We will gladly submit samples upon arrival about December 1st.

LILY OF THE VALLEY—BLEEDING HEARTS—TRITOMAS

LILY-OF-THE-VALLEY (for outdoor planting)

We import for this purpose a special grade ideal for naturalizing. The Pips are large, and will bloom profusely. We do not recommend these for forcing however. We have built up a big business on these, and last season again we were compelled to refuse many late orders.

IRISES — ANEMONES — RANUNCULUS

Everyone knows the value of these beautiful bulbous Irises. The flowers are not only superior in substance, brilliancy and purity of color, but also earlier and larger than the old Spanish Iris. These Irises are unsurpassed as cutflowers; they will stand any amount of handling.

Florists have found them very profitable for greenhouse forcing, bringing in good returns in the market. The bulbs we offer are produced at our Long Island farms, grown under cool weather conditions and free from the mosaic diseases.

Queen Wilhelmina—Pure white, slight yellow blotch on the falls	22.50

ANEMONE (Windflower)

Decidedly popular leading market flowers. Florists who force them are amply repaid. Color effects are unsurpassable. A prolonged marketing season can be obtained by planting successive batches. For best results bulbs should be started in sand well moistened and transplanted in about a week's time. We recommend the 1 year old bulbs, as these will give the best flowering results. For outdoor planting bulbs should be in the ground not later than the first part of April, in well drained soil, and will then bloom during the summer.

RANUNCULUS

The Giant French Ranunculus resembles in form a miniature pompon Dahlia, but are as brilliant and varied in coloring as the Poppies and Anemones. The flowers are extremely double, almost globular, often exceed 2 inches in diameter. In forcing or for outside planting, give them the same treatment as Anemones, but they do not mature quite as early.

GIANT FLOWERING AMARYLLIS

In our constant effort to seek out such bulbous items as seem to offer the greatest promise of commercial value, we have recently undertaken the extensive culture and development of a special strain of Amaryllis and now have, at our Florida farm, the most outstanding collection ever grown in this Country.

Few flowers rival the Amaryllis in grandeur, range of color, or simplicity of culture, and it remains only for the bulbs to be available in large quantities to put them among our most popular bulbous flowers. The stock that we are growing is a selection of the finest range of colors produced by renowned specialists all over the world.

AMARYLLIS CULTURE—Amaryllis bulbs are ready for delivery early in November, but we do not recommend planting them until the latter of January when the flower buds will be showing. Plant in five or six inch pots and water sparingly until root growth develops. After flowering, the bulbs maintain active growth and about the middle of October watering must cease and the bulbs dried off by laying the pots on their sides under a greenhouse bench or in a dry cellar. Early in February the bulbs will show new flower stems and the pots should then be watered and brought into the light, a temperature of 50 degrees is best at the start, and this can be increased to 60 degrees as the flower stems develop. Applications of weak manure twice a week at this stage will strengthen the plants and increase size of flower slightly larger. Pots will be necessary as the bulbs develop size.

GIANT AMARYLLIS "RYNVELDI STRAIN" The World's Choicest

CRINUM POWELLII ALBUM

Very valuable for outdoor planting. Flower stalk well placed above the foliage. Flowers pure white. Dozen.....\$1.75 Per Hundred.....\$10.00 Per Thousand.....\$90.00

EUCHARIS AMAZONICA (Amazon Lily)

Eucharis, are among the most desirable greenhouse bulbous plants, very beautiful and free flowering. Pots should be well drained, as the bulbs require much water during flowering period. A temperature of 65 degrees to 70 degrees is best. By drying off the bulbs to some extent for a few weeks, a crop of flowers may be had at almost any season. They should not be dried to such a degree that all the foliage is lost, else the bulbs will be much weakened. The bulbs bear from two to three flowers on a stem. Dozen.....\$5.00 Per Hundred.....\$35.00

FREESIAS — CALLAS — OXALIS

Freesias are a profitable crop, providing clean healthy bulbs are planted. Our West Coast representative is constantly watching the crops as they bloom in the fields, wherefore, we can assure our customers of receiving the best bulbs produced in the various sections of the West Coast. We do not claim that we sell millions of Freesia bulbs yearly, but our customers are more than satisfied with the splendid results obtained from bulbs supplied by us.
